Professional Summary

Detail-oriented Data Analyst with hands-on Project base experience in data management, and dashboard development, combined with project experience in SQL, Power BI, Excel, and Python. Skilled in transforming raw data into clean, decision-ready datasets and building interactive dashboards that surface actionable business insights, with a strong foundation in EDA and data visualization using Pandas and NumPy. A fast learner seeking to drive data informed decisions in a professional environment.

Technical Skills

- **Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL, Postgres)
- **Data Analysis:** Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation, Data Validation, Descriptive & Diagnostic Analysis
- **Excel:** Advanced Excel, Pivot Tables, XLOOKUP, INDEX-MATCH, IF Functions, Conditional Formatting, Data Visualization
- **Business Intelligence:** Power BI, DAX, Data Modeling, Power Query, Interactive Dashboard Development, KPI Reporting
- **Databases:** MySQL, SQL Queries, Joins, Subqueries, Aggregations
- **Tools:** Jupyter Notebook, Google Sheets
- **Core Competencies:** Problem Solving, Analytical Thinking, Insight Generation, Dashboard Storytelling, Business Reporting, Data-Driven Decision Making
- **Generative AI & AI Tools:** ChatGPT, Julius AI, Google Gemini, Prompt Engineering, AI-assisted SQL/Python development, automated data analysis, data visualization, and insight generation

Projects

Smoking Health Risk Analysis

[Project Link](#)

Tools: Excel, SQL, Power Query, Power BI, Python Pandas

- Analyzed 2,500+ health records to identify patterns between smoking behavior, age, gender, and health-risk indicators.
- Identified age-wise and gender-wise differences in smoking prevalence, helping highlight demographic groups with comparatively higher risk exposure.
- Compared smokers vs. non-smokers across key health indicators to identify potential relationships between smoking habits and health outcomes.
- Built an interactive Power BI dashboard with 8+ visuals and 10+ DAX measures, enabling users to drill down into risk patterns by demographic and smoking-related factors.

Price Analysis Dashboard

[Project Link](#)

Tools: Excel, SQL, Power BI, Python Pandas

- Developed an interactive Power BI Price Analysis Dashboard analyzing 1,000+ retail transactions using dynamic slicers, KPI cards, maps, bar charts, line charts, and pie charts to monitor sales, discounts, and product performance.
- Created 10+ DAX measures including Total Sales, Average Sales, Total Discount, and Last Month Sales, enabling monthly, regional, category-wise, and product-wise performance analysis.
- Transformed and cleaned 1,000+ records using Power Query and Python Pandas, performing data type correction, duplicate removal, null-value handling, and date transformations to improve data quality.
- Built an interactive data model with 10+ cities, 4 regions, and 2 years of sales data, enabling drill-down and cross-filtering to identify top-performing products, high-sales regions, and monthly sales trends.

E-commerce Business Questions

[Project Link](#)

Tools: MySQL

- Analyzed 10+ business scenarios using advanced SQL techniques including CTEs, Window Functions, LAG, DATEDIFF, CASE, and Aggregate Functions to generate actionable business insights.
- Developed quarterly and monthly revenue analysis, calculating QoQ growth, cumulative revenue, and month-over-month order changes to identify seasonal and revenue trends.
- Performed customer repurchase and order-gap analysis using LAG() and date functions, helping identify customer purchasing frequency and retention patterns.
- Analyzed product, regional, discount, and return performance, including quarter-wise top products, 7-day return detection, discount impact, and regional revenue ranking using SQL.

Education

Master of Science in Data Science and Analytics

2026 – 2028

Indira Gandhi National Open University (IGNOU), Delhi

Bachelor of Commerce

2024

Indira Gandhi National Open University (IGNOU)

Certification

Data Analysis Certification

2026

Focus: SQL, Power BI, Excel, and Python for Data Analysis [Link](#)
