

Dheeraj Sharma

Data Analyst | SQL | Power BI | Excel | Python

idheerajsharmax@gmail.com | +91 95992 72499 | Delhi / Gurugram | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Detail-oriented Data Analyst with hands-on Project base experience in data management, and dashboard development, combined with project experience in SQL, Power BI, Excel, and Python. Skilled in transforming raw data into clean, decision-ready datasets and building interactive dashboards that surface actionable business insights, with a strong foundation in EDA and data visualization using Pandas and NumPy. A fast learner seeking to drive data informed decisions in a professional environment.

Technical Skills

SQL	Joins, Subqueries, Window Functions, CTEs, Query Optimization
Power BI	Interactive Dashboards, DAX, Measures, Calculated Columns, Filters, Power Query, Data Storytelling
Excel	Pivot Tables, VLOOKUP/XLOOKUP, Data Cleaning, Charts, Exploratory Data Analysis (EDA)
Python	Core Python (Lists, Tuples, Dict, Loops, Strings), NumPy, Pandas, Matplotlib, Data Cleaning & Manipulation
Tally ERP 9	Bookkeeping, Invoicing, Ledger Maintenance, GST & TDS Accounting, Bank Reconciliation
AI Tools	ChatGPT (query drafting & documentation), Google Gemini (research & interpretation), Julius AI (AI-assisted analysis)

Projects

Price Analysis Dashboard

Tools: Excel, SQL, Power Query, Power BI, Python Pandas

- Developed an interactive Price Analysis Dashboard in Power BI with dynamic slicers, KPI cards, maps, bar charts, line charts, and pie charts to monitor sales, discounts, and product performance.
- Created DAX measures for Total Sales, Average Sales, Total Discount, and Last Month Sales, enabling stakeholders to analyze monthly, regional, category-wise, and product-wise business performance.
- Built a scalable data model with interactive visualizations and drill-down capabilities, improving decision-making through real-time insights into sales trends, regional distribution, and top-performing products.

Northwind Sales & Revenue Analytics Capstone Project

Tools: Excel, SQL, Power Query, Power BI

- Engineered an end-to-end sales and revenue analytics pipeline on the Northwind relational database, integrating customer, order, product, supplier, employee, and shipping data across multiple linked tables.
- Wrote SQL queries using joins, subqueries, window functions, and CTEs, then built an interactive Power BI dashboard translating raw transactional data into KPI visuals for sales performance and order fulfillment tracking.

Retail Mart Dashboard – Walmart Sales Analysis

Tools: Excel

- Designed a dynamic, Excel-based retail analytics dashboard analyzing Walmart sales performance, customer behavior, and profit trends across multiple business dimensions.
- Applied pivot tables, VLOOKUP/XLOOKUP, and advanced charting to identify sales trends and top-performing products, enabling faster spotting of underperforming categories.

Super-Store Sales Analysis Dashboard

Tools: Excel, SQL, Power Query, Power BI

- Built an interactive Power BI dashboard analyzing sales, profit, and return trends across product categories and regions.
- Performed Year-over-Year (YoY) and category-wise profitability analysis, delivering regional performance tracking views.

Education

Master of Science in Data Science and Analytics

Indira Gandhi National Open University (IGNOU), Delhi

Pursuing 2026 – 2028

Data Analysis Certification

Focus: SQL, Power BI, Excel, and Python for Data Analysis

2026

Bachelor of Commerce

Indira Gandhi National Open University (IGNOU)

2024

Strengths

- Strong analytical and problem-solving skills, translating raw data into clear, actionable insights.
- Fast learner with meticulous attention to detail across data cleaning, transformation, and dashboard design.
